SEA MINIPOP

Light-Weight Compact Multi-Sensor Stabilized Electro-Optic System

GENERAL

Sea MiniPOP is an advanced gyro-stabilized single-LRU electro optical payload designed specifically for **maritime platforms**. Incorporating up to four state of the art sensors, Sea MiniPOP delivers high performance stabilized surveillance and targeting from a compact and lightweight package. Optimized for small vessels, patrol craft, and unmanned surface platforms, it provides reliable operation and enhanced situational awareness in harsh marine environments.

HIGHLIGHTS

- MWIR thermal camera with continuous zoom
- HD daylight camera
- Digital interfaces
- Low weight and compact design
- Laser pointer and eye-safe range finder
- Automatic video tracker
- Proven performance in high sea-state conditions
