

TEASER

Squad & Platoon Level, A Game Changer
for the modern battlefield

TEASER

Seeker-less Automatically Guided Missile

GENERAL

TEASER missile, developed by IAI, is a groundbreaking addition to your arsenal providing a precise, reliable, and cost-effective solution for modern warfare.

TEASER is an ACLOS (Automatic Command-to-Line-Of-Sight) individual assault missile designed to attack ground forces, structures, lightly armored vehicles and low-altitude aerial vehicles.

ADVANTAGES

TEASER provides high accuracy without the use of a homing device and offers the following benefits:

- High payload-to-weight ratio
- Cost effective missile
- No GNSS needed
- Simple and fast to operate.
- The Teaser-Sight uses internal day and night vision channels and can also use external video sources, thus enabling the system to be configured to the specific needs without requiring any changes or adaptations to the missile.

HIGHLIGHTS

- Max range: 2,500m
- Multi-Purpose warhead anti-personnel/structures
(Optional proximity sensor available for aerial targets)
- Speed 200m/s
- Length: 70 cm
- Diameter: 8.4 cm
- Easy integration with existing optics
- Flexible Launch operation:
 - Shoulder Launch: Teaser-Sight attached to missile launch tube guides the missile to its objective.
 - Mounted Launch: The user employs the Teaser-Sight to remotely fire the missile at its target.
