

BARAK MX

Naval | Land | Air Missile Defense System

BARAK MX

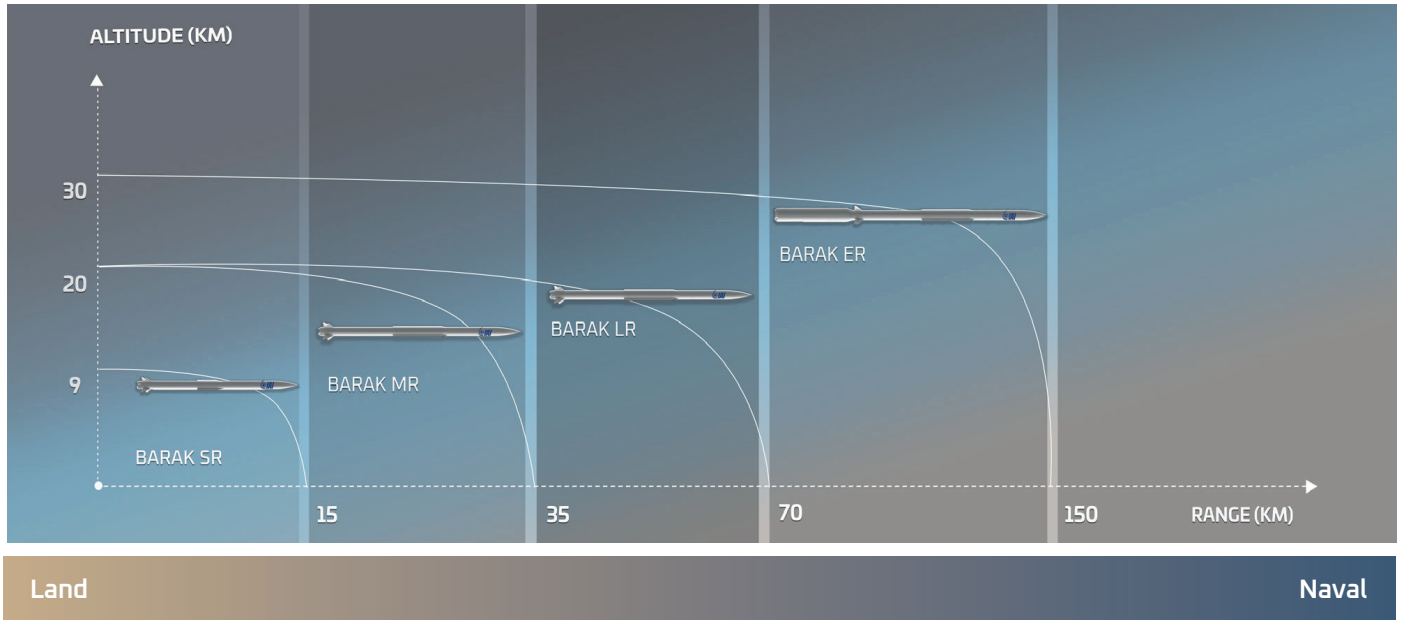

A revolution in air and missile defense

GENERAL

- All-threats battle management capability
- System configuration by the user for different missions
- Modular architecture for future capabilities
- Network centric configuration supporting advanced joint operation and air defense redundancies

CAPABILITIES

- All-threats capability – Air Breathing Targets (ABT), super- and and subsonic cruise missiles
- Tactical Ballistic Missiles (TBM) and hypersonic missiles
- Naval & land unified system configuration
- Mixed missile load on launchers
- Automatic interceptor selection (optimized cost/threat operation)
- The system is integrated with multiple IAI/ELTA land and naval AESA radars (MMR, MF STAR, ALPHA etc.)
- The system's modularity and flexibility allow smooth integration with the customer preferred sensors
