

HARPY

Anti-Radiation Loitering Munition

HARPY

Anti-Radiation Loitering Munition

GENERAL

With over 40 Years of field operational experience combining capabilities of a UAV and a missile, HARPY searches, identifies, acquires, attacks and destroys enemy radar targets. As a fully autonomous and independent weapon system, HARPY is highly effective against a wide spectrum of modern air defense systems.

Highlights

- Remarkable and unmatched mission success in combat
- Suppression & destruction of enemy air defense systems
- Fire and Forget – sensor & shooter combined in a single platform
- State-of-the-art anti-radiation seeker with wide RF coverage
- Vertical angle of strike capability maximizing weapon lethality
- Longer range and extended loitering capability
