Anti-Radiation & Electro-Optic  
Loitering Munition

# MINI HARPY

## Anti-Radiation & Electro-Optic Loitering Munition

The MINI HARPY provides tactical forces with the ability to suppress the area of interest for long duration and to strike immediately emitting and non-emitting targets. It is the only loitering munition with a dual EO/IR and anti-radiation (AR) seeker.

Capable of automatic search and engagement of both stationary and moving targets of all types. The MINI HARPY is stored, transported and launched from a sealed canister carried on any ground or maritime platform.

### HIGHLIGHTS

- Dual EO/IR and anti-radiation seeker
- Combines the advantages of HAROP and HARPY
- Silent operation using electrical propulsion
- Abort and re-attack capabilities
- Mission execution under adverse weather conditions
- "Man in the Loop" to avoid collateral damage

### SPECIFICATIONS

Weight	50 kg
Warhead	7 kg
Endurance	1 hour
Range	100 km
Strike Precision	CEP < 1m
Speed	200 knots
