

OPTSAT 3000

High-resolution EO imaging system

OPTSAT 3000

High-resolution EO imaging system

IAI's OPTSAT 3000 delivers exceptional performance tailored to your special needs.

This is an optical observation satellite system for multi-purpose applications and national critical requirements, enabling the customer full sovereignty (owning a complete operational system).

OPTSAT 3000 provides better than 40 cm resolution, image quality, agility, throughput, multimode imaging capability, geo-location accuracy and levels of operational autonomy, packed in a unique ratio of weight to performance.

OPTSAT 3000 offers the most cost effective solution and Life Cycle Cost (LCC).

The satellite is in serial production.

IAI provides comprehensive turnkey solutions, including ground stations, mission centers, data analytics, launch, maintenance, training and unique customer services.
