

Tactical POPSTAR

Terrain Dominance Sight

Tactical POPSTAR

Terrain Dominance Sight

GENERAL

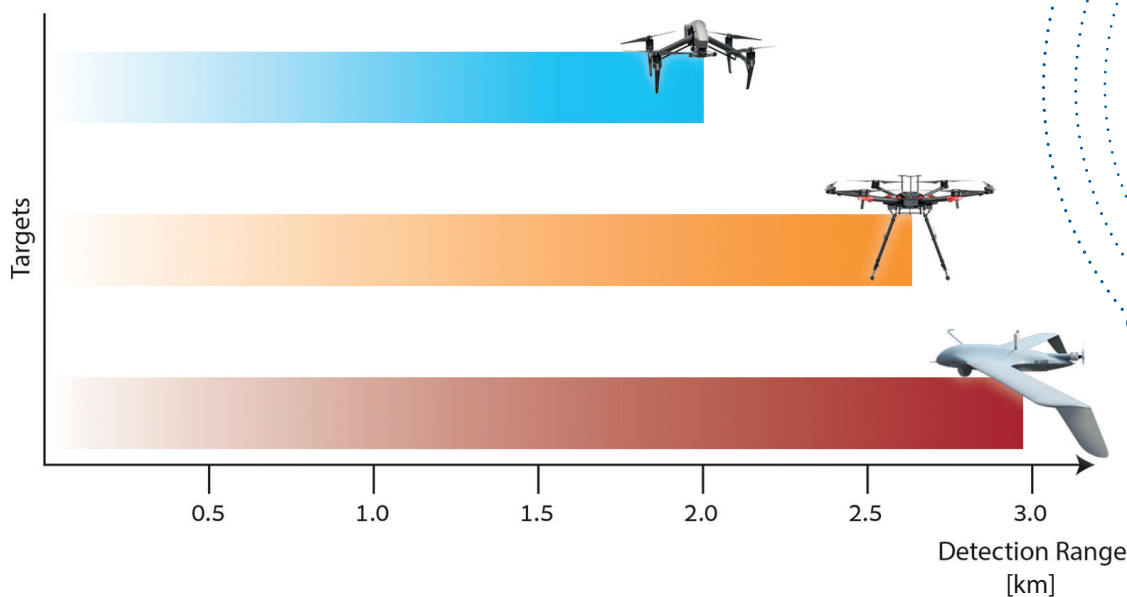

The Tactical POPSTAR system is a unique 360 degrees Automatic Target Detection System. This is a threat investigation system using breakthrough technology. The Tactical POPSTAR provides 24/7 day and night continuous color video and terrain dominance over a wide area enabling automatic detection and analysis of the threats.

HIGHLIGHTS

- 24/7 and fully passive system
- Day & night color operation
- 60x10 degrees panoramic coverage in ultra-high resolution
- Live video streaming and recording
- Automatic Target Recognition (ATR) and tracking
- Light weight
- Gimbaled
- Can be easily integrated with interception systems

APPLICATIONS

- Airport protection
- Protection of sensitive facilities
- Border control
